Congressman Hamlin in advertising "his" clean bill of health fails to produce the nurse's chart so that it may be checked up. It is possible that there is still lurking in his system some more of the same poison that he ejected on February 14, 1916, when he made his embargo speech.

At that time Mr. Hamlin intimates that he was praying for peace—praying for a shameless peace when only nine months before 114 of his countrymen "were sent to their death in circumstances unparalleled in modern warfare."

No man inocuable with kultur should be exposed to its virulence again, but instead, should be sent to a detention camp in the Ozarks for an indefinite period.

Boil Your Drinking Water.

A recent examination of our city water from a sample sent away by Mayor Minor and examined in the laboratory of Dr. Frank J. Hall at Kansas City, shows that it is heavily contaminated and should be boiled before drinking.

Dr. Hall in his report says, "This germ, colon bacilli, shows the water to be heavily contaminated with ofal, from animal or human sources. Such water as this should certainly be boiled before using for drinking purposes. I have no hesitancy in condemning your water supply, as being distinctly suspicious of the danger of transmitting typhoid fever or other infectious diseases."

DON'T GET INTO A STEW

—If your idle machinery
—is all shot to pieces with rust and rot;
—don't waste your breath and spoil your temper cursing
your luck.
—better sheds—and more of 'em.
—that's what you need.
—carelessness in the care of costly machinery is mighty
expensive. Sun, rain and wind will "rot" a valuable machine
a lot quicker than will legitimate use.
—we have some mighty fine Lumber for sheds—reasonable,
too.
—ask our prices.

Let the Depth of Your Pocket Show the Depth of Your Patriotism

While you are at home tonight, many American boys "over there" are out in the rain and mud dodging death from bomb and shrapnel.

While you are enjoying your evening cigar, some American soldier may be smoking his last.

The boys in the trenches are risking their lives for you; and you are not even asked to risk your money for them. But you are expected to loan your money—loan it at four per cent. compound interest, the highest rate the Government has ever paid.
